

Ringformet solformørkelse – Indien 2010

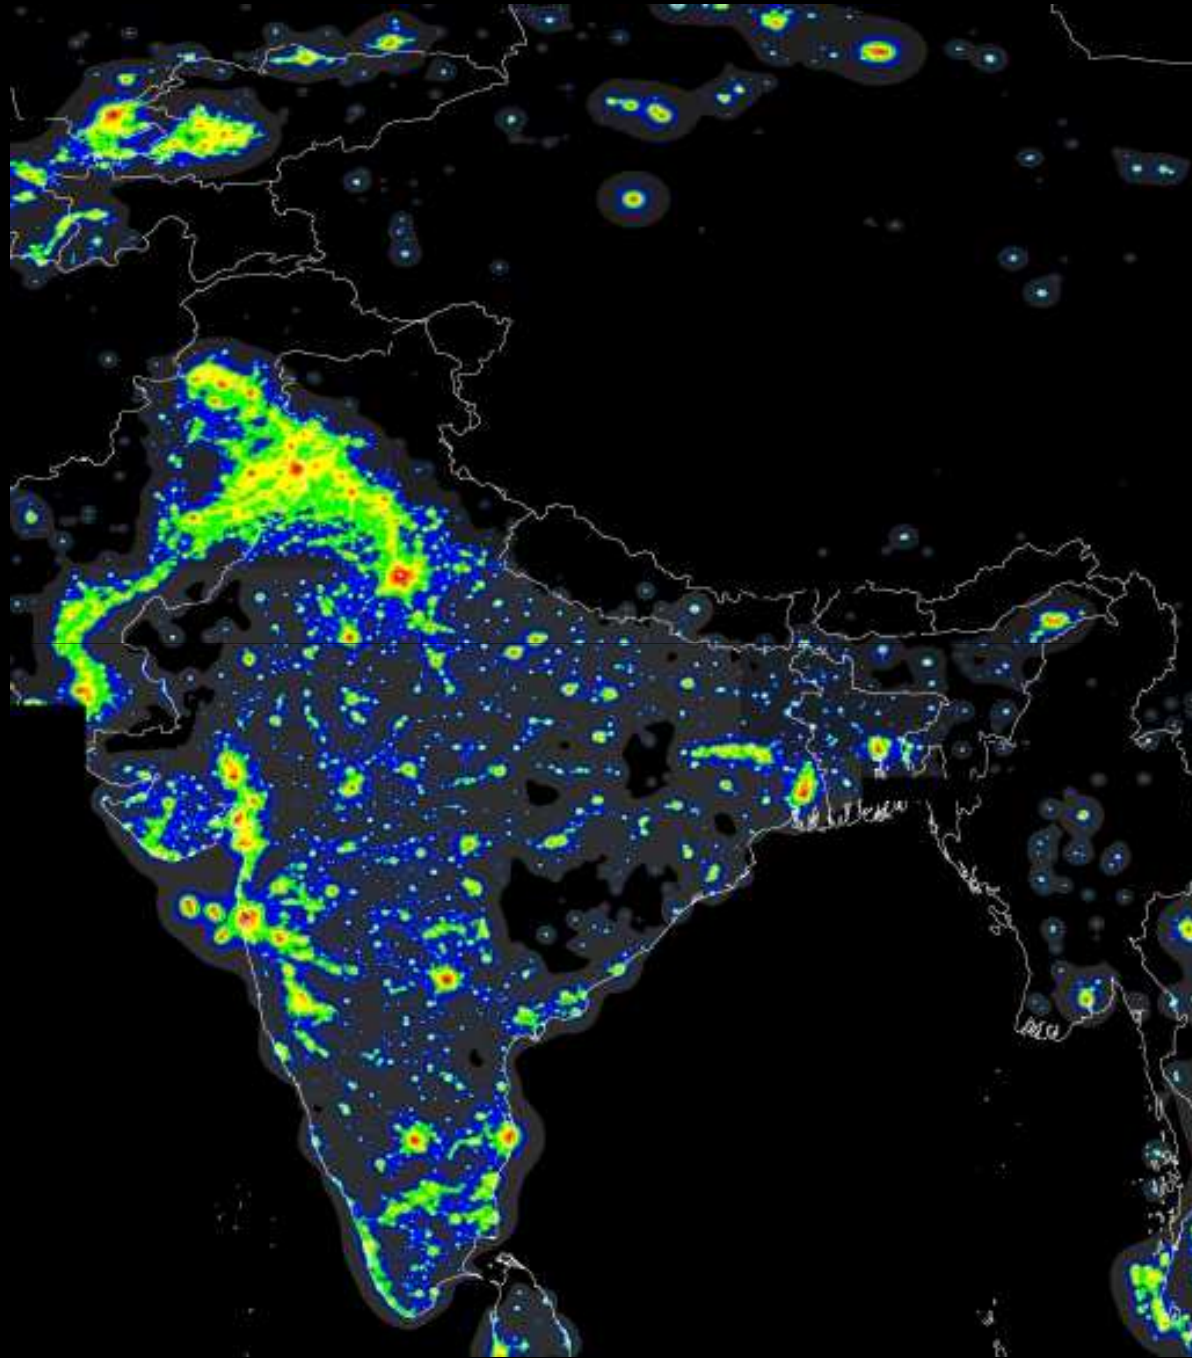

Lidt om Indiens nattehimmel

Mikael Svalgaard – www.leif.org/mikael

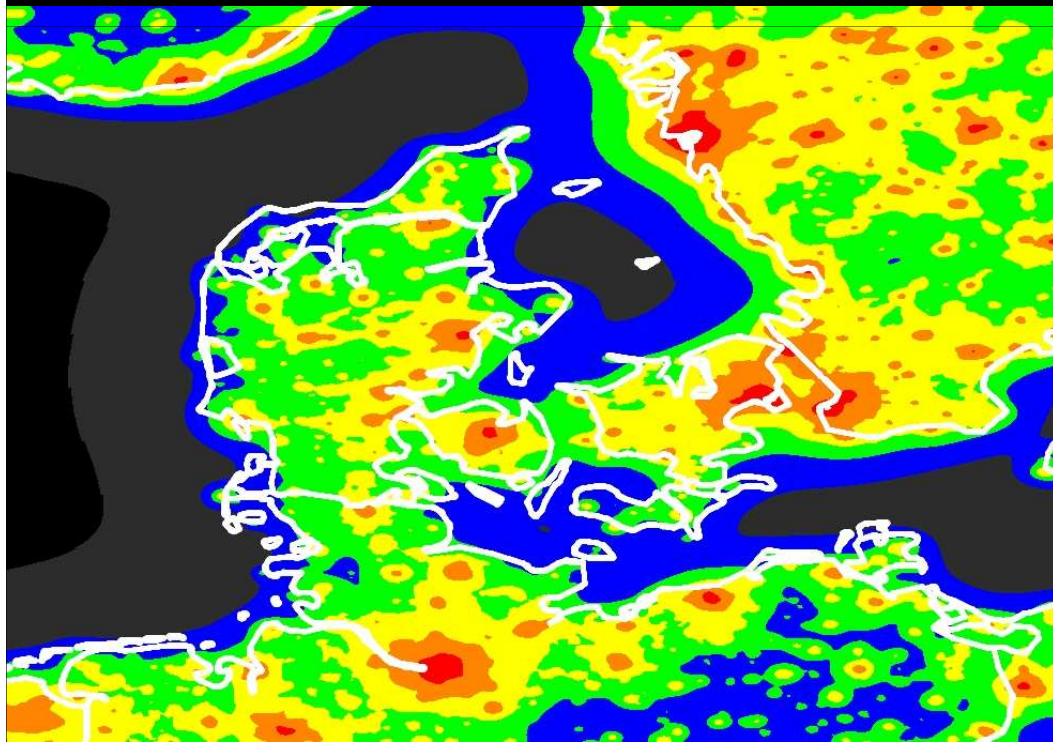

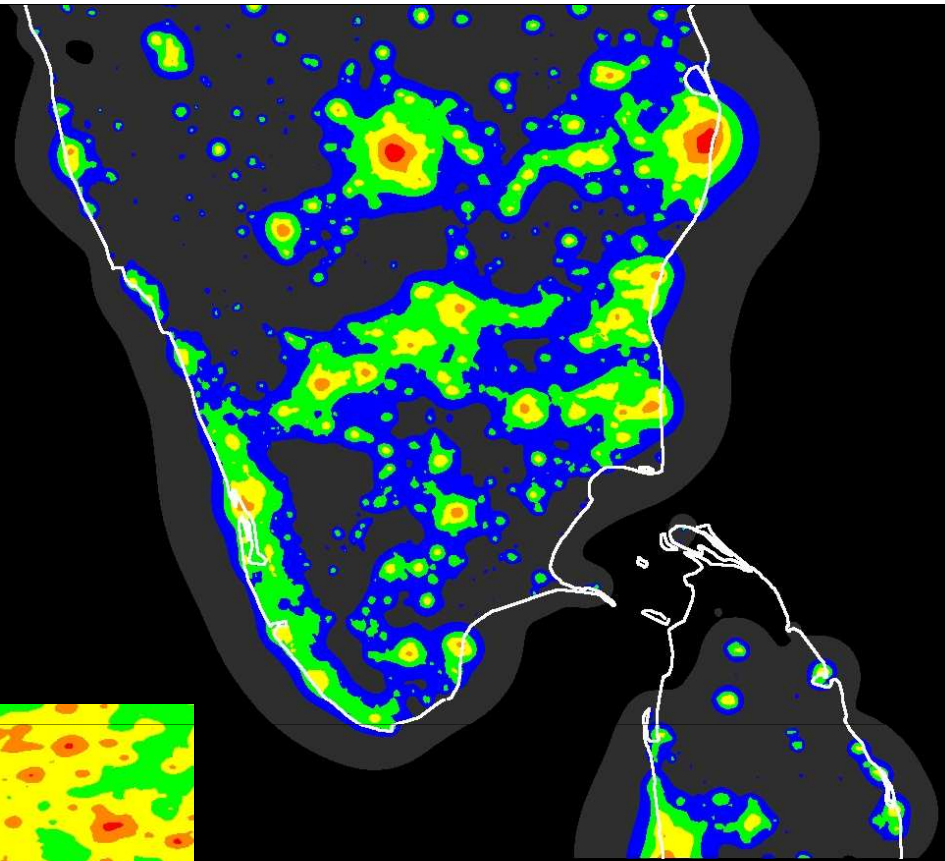

Farven viser hvor mørk himlen er i Europa (rød/hvid: meget lys; blå/grå: meget mørk)

- og i Indien

Syd-Indien har typisk mørkere himmel end Danmark!

cirka kl. 18.30 (8 minutter efter solnedgang)

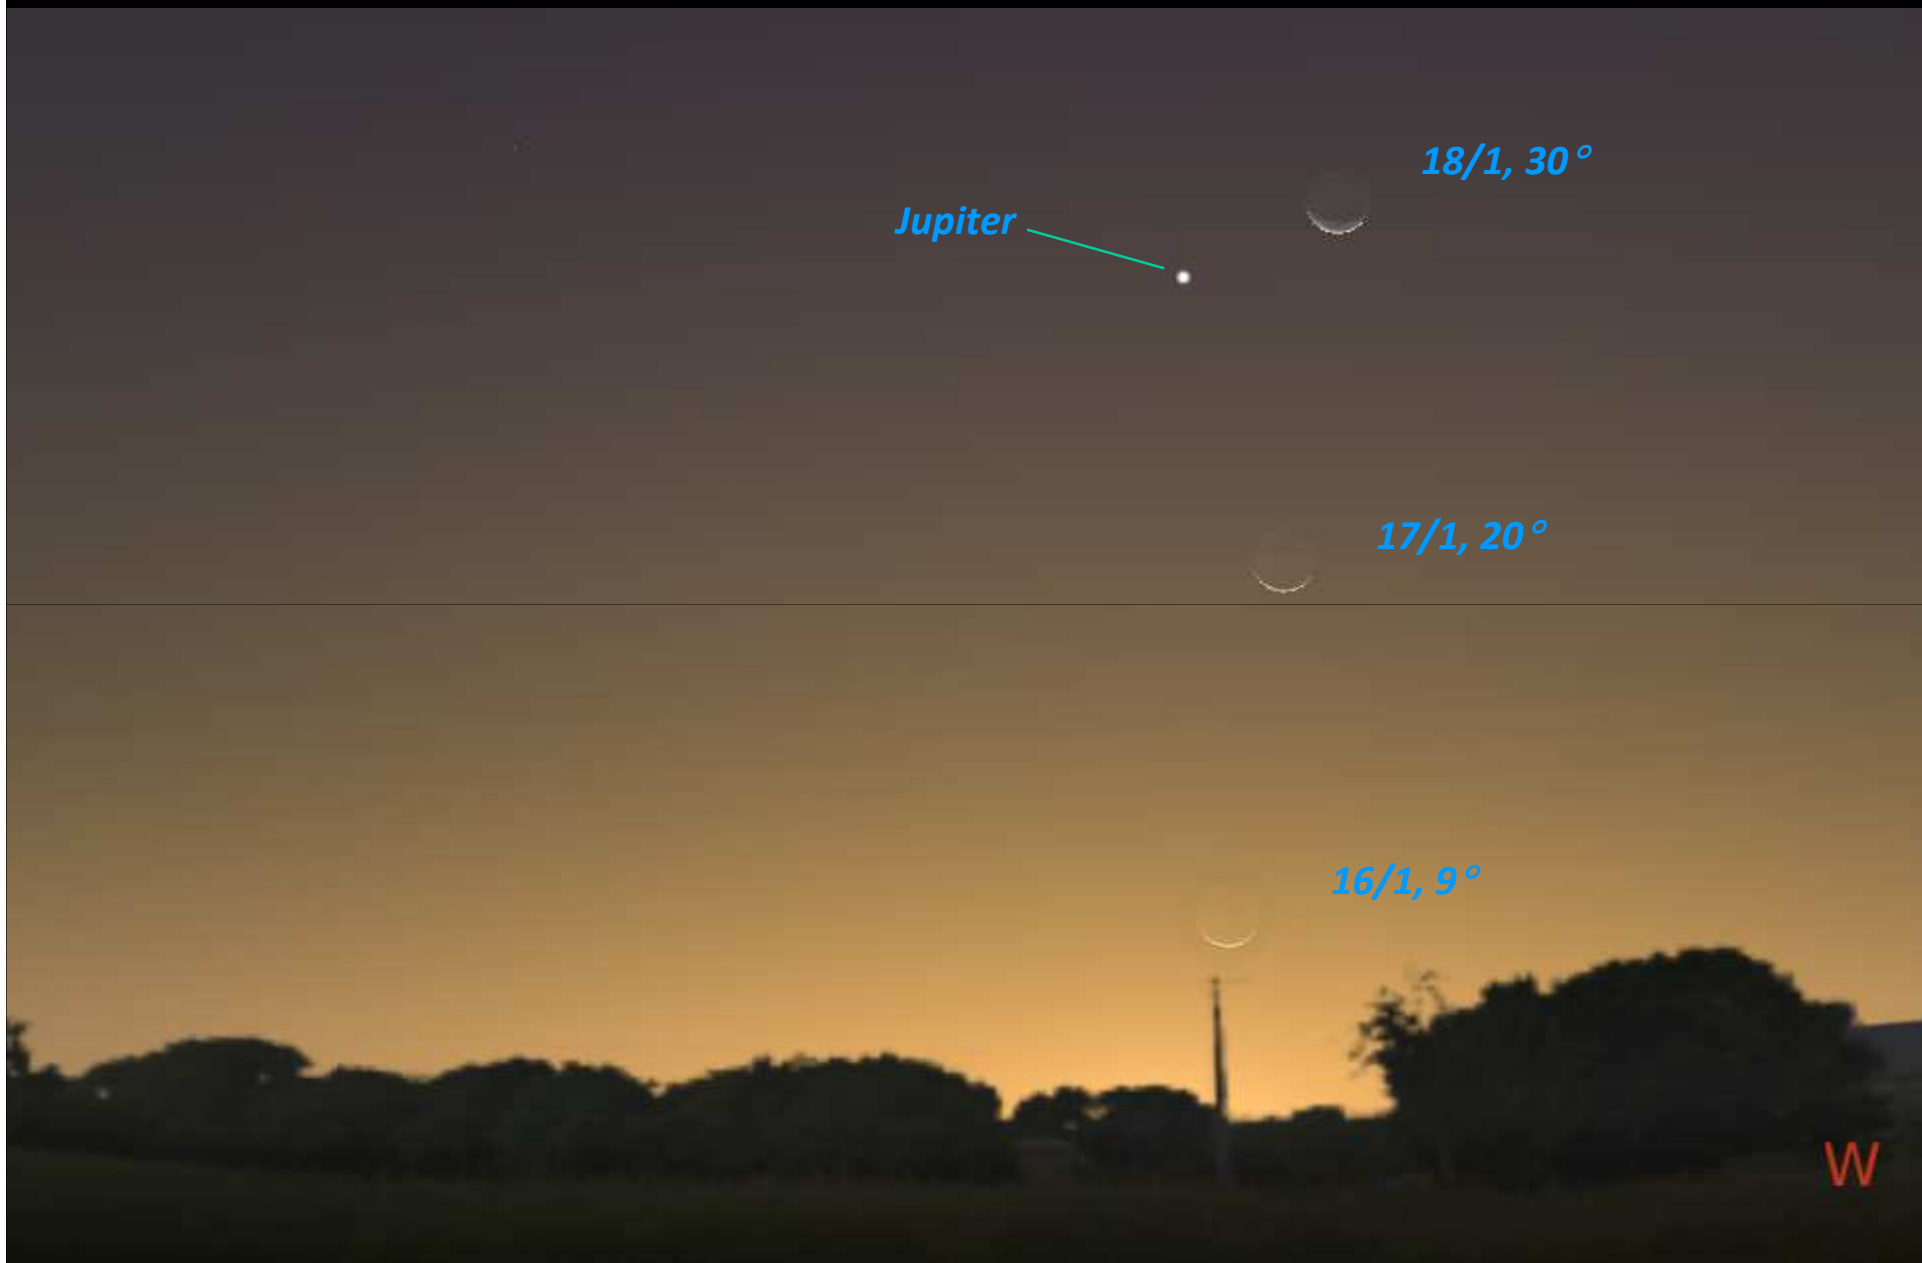

Jupiter

18/1, 30°

17/1, 20°

16/1, 9°

W

cirka kl. 22.00 (fra Indien, 8° nordlig bredde)

Earth, Syd Indien, 4m

FOV 113°

15.3 FPS
